WORK EXPERIENCE

Federal Reserve Bank of San Francisco

01/2021 – Present

Research Associate

San Francisco, CA

- Provided assistance processing data, implementing structural models, and producing regression results for research economists.
- Managed seasonal data updates and provided visualizations of key economic indicators, as part of the FOMC cycle, which contributed to Bank policy discussions.
- Organized internal classes for other research associates, led by PhD economists.

Federal Reserve Bank of Dallas

06/2020 – 08/2020

Research Intern

Dallas, TX

- Worked alongside a research economist to develop topical scenarios and analysis under a Ricardian framework of trade.
- Implemented cutting edge, structural trade models in MATLAB with the ability to characterize how tariff policy affects multi-sector economies with sectoral linkages.

Summer Undergraduate Research Fellowship

06/2019 – 08/2019

Undergraduate Researcher

Houston, TX

- Developed a research design to estimate the causal effect of light rail transit on neighborhood economic outcomes.
- Implemented quasi-experimental regression techniques to identify income effects produced by transit-oriented infrastructure.

EDUCATION

University of Houston

Fall 2020

B.S. Economics and Mathematics

Houston, TX

- Maintained a 3.9 GPA
- Notable Classes
 - Econometrics (1st year PhD)
 - Partial Differential Equations
 - Linear Algebra
 - Probability Theory
 - Game Theory

COMPUTER & SOFTWARE EXPERIENCE

- Stata
- MATLAB
- R
- Python

STATISTICAL SKILLS

- Regression Analysis
- Quasi-Experimental Methods with Panel Data
- CITI Program certified for human research
